Three Inches of Rain in Champion District

The copious moisture provided by the rain and snow which fell from Wednesday April 20, to Monday April 26, appears to have been practically general all over the west, 21 inches of rainfall being recorded in this district. While seeding operations were held up abruptly, there was no disposition to find fault with the weather man. Estimates of the acreage sown in this vicinity varied from 15 to 25 per cent of the whole. Opinions vary as to whether the wheat sown before the precipitation or after it will be the best at harvest time, but all are satisfied that prospects have been wonderfully improved by this splendid rainfall.

Members of the Ladies' Aid and W. I. and other friends gathered at the home of Mrs. E. Latif on Friday afternoon to do honor to Mrs. R. Luchie who is leaving shortly to make her home in Nobleford. A pleasant afternoon was spent in contests, music and readings, after which Mrs. J. N. Beaubien in a fitting address presented the guest of honor with a gift. Refreshments were served.

Seeding operations will be resumed when the fields dry out enough. This is a decided different situation from that of the past year and the condition is exceedingly hopeful in consequence. With such a good start and an unusual moisture reserve a medium rainfall during the season will insure a crop.

A telephone crew is in Champion, busy repairing telephone lines damaged by the recent storm. They are making rapid progress and all lines will be in order in a short time.

Local & General

H. C. Crane has 800 acres of wheat seeded.

Flowers for Mothers' Day. Order at Economy Cash Store. Roy Luchie moved his family to Nobleford on Wednesday.

Dr. and Mrs. Freeze returned home from Calgary Monday April 25.

C. G. Iverson is convalescing at his home following his illness at the Vulcan Hospital.

Morley Hayes of Calgary was a week end visitor at the home of Don Campbell.

We hear reports to the effect that a horse-shoe club may be formed in Champion in the near future.

Mrs. Geo. Campbell entertained at bridge on Wednesday afternoon in honor of her guest Mrs. J. McLeod of Brant.

P. Gatenby will move on Saturday, into the house formerly owned by Mrs. Barker. Mr. Humm will take up residence in the house vacated by P. Gatenby.

Gordon McIntyre of Bellevue Alta. has been visiting his brother, Jock McIntyre, during the past week.

The date for the Mother and Daughter banquet has been set for May 6th.

R. E. Phillips, commercial manager of Alberta Government Telephones, visited the Champion office on Tuesday April 19.

Mrs. Bain, Mrs. Williamson, Mrs. Dawson, Mrs. R. I. Baker were tea hostesses Wednesday afternoon at the Parsonage. A large number of ladies attended.

Mrs. H. Lamont has been called to Vulcan by the illness of her mother, Mrs. Dobbs.

Gordon McIntyre, who has been visiting his brother Jock, returned to Bellevue, Alta. on Wednesday, April 27.

K. R. McLean, R.O. of McLean & Anderson, Sight Specialist of 224-8th Ave West, Calgary, will make his monthly visit to Champion, Friday, May 20th, at the Drug store.

Brant Banker Is

Transferred to Bawlf

(Lethbridge Herald)

Thursday evening a reception and card party was given at the home of Mrs. G. B. McKay in honor of Mr. and Mrs. J. B. McLeod and Mrs. Kelly, who leave shortly for Bawlf, Alta. to which place Mr. McLeod has been transferred by the Canadian Bank of Commerce. In spite of the heavy snowfall the invited guests turned out to the entertainment which was in the nature of a farewell party for the McLeods. The McLeod's friends, of which they have a host, made a supreme effort to get there to show them the esteem that the family has been held in during the time they have been living here. They first came here in the fall of 1923, and lived here continually since. Mrs. McLeod is a splendid entertainer, and was always ready to take part in anything that was of interest to the community.

Mr. McLeod who has held the position of manager of the Canadian Bank of Commerce all the time while here, took a keen interest in everything of local interest, and could always be depended upon to help with anything that was progressive in the community. The reception in their honor was enjoyed by the number of friends of the family, and was given by Mr. and Mrs. G. B. McKay. A sumptuous lunch was served at mid-night.

Mrs. McLeod's mother, Mrs. Kelly, who has been living with them for the past number of years, is well liked throughout the community.

"Touchdown"

"Touchdown" is not a time-worn story, not a heyday, gay comedeeeking cry with a few pennants thrown in and a big dance at the finish. Rather not! "Touchdown" is the real work! It is a story about football life as it affects three types of persons who are vitally concerned with it—the business man who supports the team, either financially or just morally; the coach who gets a high salary to win games—and the young athletes who play the game, sacrificing their health, sometimes their lives, to win victories.

"Touchdown" goes into all this, intimately. Mothers who see it will find out why their football-playing sons glory in the painful hurts inflicted in gridiron battles. Women generally will find a new kind of heroine in Peggy Shannon as the football coach's sweetheart.

And EVERYBODY, young and old, will get a tremendous wallop out of the spectacular action on the playing field—done with the reality of production, the substance to painstaking authenticity that has always been paramount with Paramount.

NOTES AND COMMENT.

"Newspapers are undeniably the primary medium of advertising, which have won the receptive attention of the general public. They are the official disseminators for the demand of information and public announcements. Newspapers are read regularly for the news, and the advertiser's message, intelligently prepared, is readily accepted as a part of the week's news," says Andrew Connolly, publicity director for Joseph Horne Store, Pittsburgh. Every week keying business families turn to this newspaper for money-saving suggestions. What have you to sell them?

We can tell the farmer to the decimal point how many acres of soil or how much a man should plow in a twenty-four hour day with a team of horses or with a tractor. We can inform him that he should be able to grow potatoes for fifty cents a bushel. Likewise that the average length of life of a blinder is 20 years, and that a good plow should live to the fine old age of 10.3 years.

Yes, sir, we can fairly spout statistics and figures which would amaze the man on the farm. But honestly, brother, when you ask how to make money selling eggs at less than 15c per dozen, and when you want enlightenment on how to wax fat on selling pigs with their boots on at \$3.00 per hundred, we must follow our usual policy of being frank, and our answer is that we have a sneaking suspicion that you can't do it.

Diverse persons refer to newspapers as the "capitalist press." Still others accuse it of "monopolizing public opinion," whilst from a third quarter comes the report that the press is "biased." Allow the writer of this column to answer these charges:

Firstly, the public press is "capitalist" in the sense that it requires capital to "carry on" with. Without capital the newspapers would have to suspend operation.

Secondly, true, the press moulds public opinion, but it also reflects public opinion in its letters to the Editor column.

Thirdly, if some of our politicians were as unbiased the country would be better off. After all, it is impossible to please everyone, not especially critics.

Bailed wheat is being sold by some city restaurants as a cereal at ten cents a bowl. Canned wheat, prepared for the table as a new food product, is now proposed by a correspondent as a means of solving the wheat surplus problem of Western Canada.

His plan would provide for the absorbing of large quantities of the cereal, processing the grain, packing it in cans and marketing it as a "whole wheat, all the wheat, ready-cooked cereal." Small cans would sell at 10c, perhaps, at seven cents, and larger cans at 15c. Thus the grower, it is estimated would be able to realize at least 5c on a bushel of wheat.

It is asserted that the plan will entail no loss to millers, bakers, or to any other users of wheat.

In the last ten years mechanical transportation has killed no fewer than 42,000 British subjects, a colossal total which might be compared to the casualties in a considerable war. It must be said that the enormous toll of casualties on the roads is a black mark against motor transportation, although it is to be feared that, owing to the radical difference in running conditions, it is impossible that the roads can ever be made as safe as the railways.

A forthcoming screen production is "Little Girl Blue." So don't be surprised if some alert producer doesn't bring out "Little Joe Peep," participating a general rush to the nursery rhyme as title and plot source. Strange things happen in the film industry and it is just possible that Mother Goose may be the source of a lot of golden movie eggs.

CANADA THE WORLD'S GREATEST PLAYGROUND

Wide Variety of Recreational Attractions
Canadians Fortunate in Holiday Advantages Their Country Offers

THE majority of Canadians probably do not realize what a wonderful choice of vacation opportunities this country offers. How many of us in any one province have first-hand knowledge of the wide range of attractions of our neighboring provinces? Many no doubt have gone abroad to seek a holiday forgetting that our own Dominion is unequalled in the exceptional variety and range of its recreational resources. Surely a country which attracts visitors from other countries by the tens of millions must have recreational features of interest to its own citizens.

Recreational Areas Easily Accessible

It is so easy to travel in Canada that an interprovincial tour is a recreation which every Canadian vacationist may well and profitably undertake. All the developed and much of the undeveloped part of the Dominion is easily accessible by train, boat, or automobile. Canada is served by two of the world's greatest railway systems and a number of smaller lines. The equipment and service are of the highest standard. Steamers built especially for pleasure cruising afford many pleasant trips along the coast and through inland water systems of lakes, rivers and canals. A cruise on the Great Lakes to the Maritime Provinces is nearly equal, in distance, to an ocean voyage. Good roads lead to practically all scenic and sporting territories. Canada's road network includes many thousands of miles of surfaced highways, well equipped with direction signs and danger signals. Tourist accommodation, from camping to hotel, is available almost everywhere.

National Parks Cover Large Area

National and provincial parks in Canada cover nearly 20,000 square miles. They are areas which have been withdrawn from exploitation and are being preserved in their virgin beauty and wildness for purposes of pleasure and recreation. The largest and most famous are in the Rocky Mountain section of Alberta, a region of unsurpassed scenic splendor admirably equipped by nature for all forms of sport and recreation. There are also important parks in British Columbia, Saskatchewan, Manitoba, Ontario and Quebec. An automobile route takes the way from these western hotels to the big cities of the east.

one of the chief attractions in the parks, but game animals and birds are rigidly protected and their fashions never fails to interest visitors.

Summer Resorts Numerous and Varied

Throughout the Dominion there are many summer resort districts which offer a wide range of attraction and variety of accommodation. On the Atlantic coast, in the provinces of New Brunswick, Nova Scotia and Prince Edward Island, are typical sea-shore resorts, where salt-water bathing, sailing and deer fishing are the principal attractions. The rugged beauty of the coast and the picturesque charm of the fishing villages, at the head of every inlet, cannot fail to enchant the summer visitor.

Quebec's summer playgrounds are of the most varied nature including as they do, sea-shore, mountain lake and forest resorts. Along the lower St. Lawrence, summer colonies have been established at many points. North of the St. Lawrence and Ottawa rivers the Laurentian mountains, dotted with pine forest and dotted with lakes constitute a vast summer and winter playground. The Eastern Townships, which adjoin the international boundary, also have a number of well-established resorts, where picturesque lakes and rivers are in addition equally attractive, only slightly less known, districts. Access to them includes everything from simple to palatial hotel, and cottages may be rented in any district.

In the provinces of Manitoba, Saskatchewan and Alberta many attractive resorts are located along the shores of the lakes and rivers. The Canadian Rockies are world famous for scenic beauty and contain some of the most highly developed tourist resorts on the continent.

British Columbia, with varied and splendid scenic attractions, is a tourist's paradise.

The National Development Bureau of that Department will gladly furnish information, maps and other information for the use of those planning a Canadian tour, and where necessary will refer enquiries to provincial and local tourist organizations. Applicants should be as specific as possible as to the section of Canada in which they are interested, in order that available information may be supplied.

Subvention On Coal

Amount Payable On Bituminous Coal Shipments To Manitoba Has Been Reduced

The maximum subvention payable on bituminous coal shipments by operators to Manitoba has been reduced from \$1.50 to \$1.20 per ton, Hon. W. A. Gordon, Minister of Mines has announced. The reduction is to place all operators who ship to Manitoba on an equality without endangering the market to Canadian coal from foreign competition.

Action follows consideration by the minister of the subvention order of 1931 placed the southern Alberta coal field at a disadvantage, as compared with the northern field in the Manitoba market.

Acceptances that have been granted prior to April 15, 1932, it is stated, will continue to be in force under the old maximum until the tonnages specified have been shipped.

By Annette

LOADS OF SMARTNESS HAS THIS SNAPPY ROUSSE WITH SLIMMING DIAGONAL CLOSING

And it's a model that can be carried out in a great many different materials. For instance, here it is in a novelty knitted woolen weave in a rather vivid green shade. The boned bodice with the fabric. Then again, you may want something a bit more formal as crepe satin in pastel shades.

The rough crepe silks are sportive, yet will meet any afternoon smartly. And it's the easiest thing in the world to fashion.

And as for the saving in cost—the medium size takes but 2½ yards of 39-inch material.

Style No. 838 is designed for sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40 and 42 inches bust.

Price of pattern 25 cents in stamp or coin (coin is preferred). Wrap coin carefully.

Urges Government Control Of Production Of Radium From Great Bear Lake Pitchblende

To consider the production of radium from pitchblende ore in the Great Bear Lake as a mining industry, supplying any large number of men was an "absurdity." This declaration was made in the senate by General D. McLean, Vancouver.

After speaking of the recent discoveries in the Great Bear Lake section, and the richness in supply of these high-grade pitchblende, the mother ore from which radium is obtained, Senator McLean declared: "I urge these figures to show the absurdity of considering the production of radium from our pitchblende ore as a mining industry. Pitchblende is a medicinal ore, required chiefly for medicinal purposes. Not by the great stretch of the imagination can it be pictured as an industry which will employ any considerable number of men, or be of great commercial value to the country."

The Flax-Seed Industry

Flax Grown Throughout Canada For Seed Rather Than For Fibre

Flax is a crop which is at present receiving quite a bit of attention by farmers throughout the Dominion. There are two principal uses for the crop, the flax seed, varieties giving the best fibre are not so well suited to seed production and, at the present time, the bulk of Canadian production is devoted to seed, which has reached an average of over 3,000,000 bushels annually. Some two and a half million bushels of flax seed are used domestically in the manufacture of linseed oil. The varieties which are being specially developed throughout the Dominion at the present time are those which offer greater value from the standpoint of quality of seed and high percentage of oil content. —Department of Agriculture, Ottawa.

Cost Of Education

Britain Spends Huge Sums For Educational Purposes

Nearly £100,000,000 is now being raised from the exchequer and taxable sources for expenditure on education in Britain, Sir Donald MacLean, president of the Board of Education, told the House of Commons when he submitted the board's estimates.

Sir Donald declared the reduction of 10 per cent. in teachers' salaries effected last autumn was not to be regarded as the government's view of the proper remuneration for teachers under less abnormal conditions. The position would be reviewed when the financial position of the country allowed, he promised.

At the same time Sir Donald reminded the House that British teachers were better remunerated than teachers in Europe.

Get the Right Fertilizer

Good Time To Consult The Soil and Crop Authorities

Never in the history of Canadian agriculture has it been more important for the farmer to be absolutely sure that he is getting the right kind of fertilizer for his crops than at the present time. Great care must be taken in the selection of the fertilizer. The farmer is to be advised that the fertilizer is to be used on the basis of his own knowledge of its proper use. As never before this matter will appear to be a good time to consult the soil and crop authorities at the agricultural colleges and Experimental Farms before making substantial purchases of fertilizer, because with proper care their use, even in these times of low farm prices, may be made profitable.

The Chinese turn soy beans not only into food and milk and cheese, but also into oil for cooking and for lamps.

The new museum of crime in Rome is under control of the Department of Justice.

"I went to the dentist yesterday." "Does the tooth still ache?" "I don't know. He kept it!" —Der Brummer, Berlin.

W. N. U. 1929

much of the undeveloped part of the Dominion is easily accessible by train, boat, or automobile. Canada is served by two of the world's greatest railway systems and a number of smaller lines. The equipment and service are of the highest standard. Steamers built specially for pleasure cruising afford many pleasant trips along the coast and on the extensive inland water system of lakes, rivers and canals. A cruise from the head of the Great Lakes to the Maritime Provinces is nearly equal, in distance, to an ocean voyage. Good roads lead to practically all scenic and sporting territories. Tourist accommodation, from campsite to hotel, is available almost everywhere.

National and provincial parks in Canada cover nearly 25,000 square miles. They are areas which have been withdrawn from exploitation and are being preserved in their virgin beauty and wildness, for purposes of pleasure and recreation. The largest national parks are in the Rocky Mountains section of Alberta, a region of unsurpassed scenic splendour admirably equipped by nature for all forms of sport and recreation. There are also important parks in British Columbia, Saskatchewan, Manitoba, Ontario and Quebec. Accommodation ranges all the way from large modern hotels, to log cabins and tents. Fishing is one of the chief attractions in the parks, but game animals and birds are richly protected and their fearlessness never fails to interest visitors.

Throughout the Dominion there are many summer resort districts which offer a wide range of attraction and

Many Like Him
A negro applied for a job, and set forth his attributes without too much modesty.

"All right," said the boss, "you can have a job; and as to salary, well, I'll pay you just whatever you're worth."

"Dat's no use to me, sah," said the applicant decidedly. "Iee gettin' no dan dat where I is now."

To Protect Game

Recommend Prohibition Of Live Decoys and Pump Guns

Prohibition of the use of live decoys and pump guns was among recommendations made at the conference of provincial and Dominion game officials at Ottawa. The conference dealt with ways and means for protecting migratory bird life of the continent, and various measures for the control of hunting and better conservation of ducks were under consideration.

It was urged in resolutions passed that every effort be made to restrict further the sale of game in provinces where this is still permitted and a recommendation was made that both daily and seasonal bag limits be made as low as possible and that the daily duck limit should not exceed 15 in any province. It was proposed that all hunters be licensed provincially and that they be required to make a return of their take.

Interpretation of the natural resources agreement between the provinces in a manner consistent with the generally recognized principles of game conservation was suggested and it was agreed that prohibition of the hunting of wild life from aeroplanes should be made a part of the air regulations.

To Encourage Horse Breeding

Government Assistance To Station Owners In Western Canada

In view of existing conditions, as likely seriously to affect horse breeding activities in the three Western Provinces during the coming season, the Honourable Robert Weir, Minister of Agriculture, has offered a plan of assistance alternative to the club system which has been in vogue.

It is agreed to pay to owners of all stations that have passed Federal inspection, a grant of five dollars per mare bred, up to a maximum of fifty mares per horse.

A sworn statement will be required covering the list of names of mare owners as submitted by the station owner. The grant will be payable at the end of the season. The offer has reference to the present year only and is calculated to provide a measure of immediate assistance to the station owner. In that this grant may be regarded by him as replacing all or part of the service money or first payment due from the breeder, the latter will be indirectly benefited.

All clubs now contemplating, or that have made application, will be advised of this plan which, in brief, provides the alternative described, where difficulty is encountered in club formation. Either plan is available.

Lifeboat crews of Great Britain and Ireland saved 269 persons last year.

Too Sick for School

Mrs. Dow Says Dr. Williams' Pink Pills Restored Daughter to Health.

"My daughter was run down in health, took weak pills and could not go to school," writes Mrs. A. W. Dow, Port Daniel, W. Va., U.S.A. "While visiting my daughter about a little girl in similar condition who had been completely restored to health by Dr. Williams' Pink Pills. My daughter has since been taking the Pills, and they have certainly made her stronger. She has lost that tired, sluggish feeling and has never missed one day's school since September. The Pills also gave her a good appetite; her nerves are better and she has more poise. I recommend Dr. Williams' Pink Pills to mothers of daughters with similar troubles."

Don't let anemia rob your growing daughter of health and vigor. Give her Dr. Williams' Pink Pills. They are no temporary relief. They banish the condition by creating new blood which invigorates health, vitality and equality. Equally good for all run down or nervous conditions. At your druggist's. 25c.

New Misses Day From School.

THE HOUSE OF DREAMS-COME-TRUE

— BY MARGARET FIEDLER
Author of "The Splendid Thing," "The Hermit of Far Rock," Holder & Stoughton, Ltd., London.

CHAPTER XIX.—Continued.

"The skunk" muttered Nick wrathfully.

"What's that?"

Claire drew suddenly closer to him, her face blanching. A scowl, the light crunching of gravel beneath a foot—step—had come to her strained ears.

"Nick! Did you hear?" she breathed.

"What?"

"The skunk," she said again.

"What's that?"

"The skunk," she said again.

"What's that?"

Claire drew suddenly closer to him, her face blanching. A scowl, the light crunching of gravel beneath a foot—step—had come to her strained ears.

"Nick! Did you hear?" she breathed.

"What?"

"The skunk," she said again.

"What's that?"

Claire drew suddenly closer to him, her face blanching. A scowl, the light crunching of gravel beneath a foot—step—had come to her strained ears.

"Nick! Did you hear?" she breathed.

"What?"

"The skunk," she said again.

"What's that?"

Claire drew suddenly closer to him, her face blanching. A scowl, the light crunching of gravel beneath a foot—step—had come to her strained ears.

"Nick! Did you hear?" she breathed.

"What?"

"The skunk," she said again.

"What's that?"

Claire drew suddenly closer to him, her face blanching. A scowl, the light crunching of gravel beneath a foot—step—had come to her strained ears.

"Nick! Did you hear?" she breathed.

"What?"

"The skunk," she said again.

"What's that?"

Claire drew suddenly closer to him, her face blanching. A scowl, the light crunching of gravel beneath a foot—step—had come to her strained ears.

"Nick! Did you hear?" she breathed.

"What?"

"The skunk," she said again.

"What's that?"

Claire drew suddenly closer to him, her face blanching. A scowl, the light crunching of gravel beneath a foot—step—had come to her strained ears.

"Then, if you are," replied Jean cheerfully, "perhaps you can hear up against the aback of too much joy. We want you to have 'a day out.'"

"A day out?" repeated Claire.

"What do you mean?"

"I mean we were organizing a picnic to Dartmouth, and we want to fix it so that you can come too. Didn't you tell me that Sir Adrian was going to be away one day this week? Going north and not returning till the next day?"

Claire nodded. Her eyes dancing with excitement.

"Yes—oh, yes! He has to go up to London on business."

"Then that's the day we'll choose. Heaven send it be fine—plucky."

"Oh, how I'd love it!" exclaimed Claire.

"I haven't been on the Moor for such a long time."

"And I've never been there at all," supplemented Jean.

"Nick! Nick!" Claire turned to him excitedly. "Did you know of this plan? And why didn't you tell me about it before?"

He looked at her, a slow smile curving his lips.

"Why, I never thought of it," he admitted. "I see—that's—explanatory—when I'm with you, I can't think of anything else."

"Nick, I won't have you making believe love to a married woman under my very nose," protested Jean equally. And the shadow of tragedy that had hovered above them a few minutes earlier broke into a spray of cherry run and banter.

"You seem very gay today."

"The cold, sneering tones left audience of the gay exchange of jokes and laughter that ensued, and the trio looked up to see the tall, lean, black-headed figure of Sir Adrian standing at the end of the path, awaiting their approach."

To Jean, as to Claire, occurred the analogy of a malevolent spider on the watch. Even the man's physical appearance seemed in some way to convey an unpleasant suggestion of revenge—his long, thin, sharply jointed arms and legs, his pitifully close, a livid mask hid by only a pair of snapping, venomous black eyes, half hidden between pouted lips that were hardly more than hanging folds of wrinkled skin, his long, lacerated, predatory mouth with its slow, malicious smile. Jean repressed a little shudder of disgust as she responded to his sneering comment.

"We are quite gay, Sir Adrian. It's a fine day, for one thing, and the sun's shining, and we're young. What more do you want?"

"What more, indeed? Except?"—towing mockingly—"the beauty with which a good Providence has already endowed you. You are a lucky woman, Miss Goodfellow; your cup is full. My wife is not, perhaps"—regarding Jean curiously—"quite so handsomely dowered by Providence, so."

He paused, and the black, pin-point eyes beneath the fabled lids looked at the slight, slender figure of Claire, slender figure, his long, thin lips widened into a sardonic smile.

"Yes, to the brim," he repeated with satisfaction. "That's a husband's duty, isn't it, Mr. Brennan?"—addressing Nick with startling suddenness.

You should know better than that, Sir Adrian," retorted Nick, "seeing that you have experienced matrimony, while I have none."

"But you have hopes—aspirations, isn't it?" pursued Latimer suavely. There was an undercurrent of disagreeable suggestion in his tones.

Nick was acutely conscious that his keenest aspiration at the moment was to knock the creature down and jump on him.

"We must find you a wife, eh, Claire? Eh, Miss Peterson?" continued Sir Adrian, rubbing the pain of one bony hand slowly up and down over the back of the other. "I'm sure, Jean, you would like to see so—intimate a friend as Mr. Brennan happily married, wouldn't you?"

"Just so—just so to see him happy," answered Claire with tight lips.

"And so—like us," agreed her husband in a queer cackling tone that quavered inwardly. "Well, get married, my dear. You are dear friends that you should know precisely the type of woman which appeals to him."

He nodded and turned to go, gliding away with an odd shuffling gait, and muttering to himself as he went: "Heavens! the type—precisely!"

As he disappeared from view down one of the branching paths of the shrubbery, an odorous little laugh, half snigger, half snigger, came to the ears of the three listeners.

Claire's face set itself in lines that she had looked years older than her age.

"You'd better look you older than she!"

"We shouldn't. We shouldn't be able to say any more now that he knows you've got here. He'll be hovering round some where."

Said Jean, nodding.

"Yes, we'd better be going. Come along, Nick. And let us know, Claire?"

as soon as you have found out for certain what day he goes away. You can telephone down to us, can't you?"

"Yes, I'll ring up when he's out of the house some time," she answered.

"Or send a message. Anyway, I'll manage to let you know somehow. Oh! stretching out her arms restlessly—"Imagine a day of utter freedom! A whole day!"

(To Be Continued.)

Delay Branch Line Construction

Parliament To Be Asked To Extend Time To August 31, 1934.

Parliament will be asked to extend the time from August 31, 1932, to August 31, 1934, for construction and completion of a number of proposed Canadian National Railway branch lines. R. J. Manion, Minister of Railways and Canals, will introduce a bill in the House of Commons to this effect.

The list of branch lines to be covered by the new measure is:

From near Unity to near the provincial boundary in townships 36 and 37, in Saskatchewan.

From Redpath to a point on the Canadian Pacific Railway near Swift Current, in Saskatchewan.

From near Central Butte or Mawer to townships 18 or 19, ranges 10 or 12, of the third meridian, in Saskatchewan.

From Hildesheim, Saskatchewan, 30 miles toward The Pas, in Manitoba.

From St. Walburg, Saskatchewan, to Bonnyville, in Alberta.

From near Bulwark to townships 38 or 39, range eight west of the 4th meridian, in Alberta.

From Dunlop, Alberta, subdivision, near Brantford, to a point on the Dunsmuir subdivision, near Gainsville, in Ontario.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From New Westminster to a point on Louisa Island in British Columbia with branches therefrom.

From a point on the Sudbury branch to a point in the Township of Fairbank, in Ontario.

From Sunnyside to Gushygrove, in Nova Scotia.

From near Swift Creek to a point near Tete Jaune, in British Columbia.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

From near Huron to townships 36 or 37, range eight west of the 4th meridian, in Alberta.

You can cook vegetables

AT ONCE
in the same saucepan by using

CANAPAR

Do each vegetable up in its own bag of Canapar Cookery Parchment.

There won't be any odor, not even from cauliflower. All the food value and flavor will be retained. And you use only one burner turned low for cooking. The flavors will not mix!

At the time with boiled or steamed fish. You'll be delighted with the results. No fussy order in the kitchen.

To succeed so little to clean up. When roasting meat, line your pan with Canapar. Fat and juice won't burn. No more scraping or scouring of the pan afterwards.

You can use Canapar repeatedly by simply rinsing it off and hanging it up to dry. It does not absorb odors. Makes a perfect dish cloth.

Buy a new and unique booklet entitled "Leavers," containing one hundred recipes as a bonus for your trouble.

Special Offer

Most grocers, druggists and department stores sell Canapar as an article, but if you haven't, send this coupon direct to the makers and we'll send you a new and unique booklet entitled "Leavers," containing one hundred recipes as a bonus for your trouble.

Appliances Food Products, Ltd.,

Enclosed find 25c for which please send me one full size package of Canapar Cookery Parchment and your 100 recipes booklet.

Canada To Be Envid

Much Better Off In Every Way Than United States

The city of Detroit has reached the same position as Chicago, Philadelphia and New York in finding it impossible to obtain enough money to pay municipal employees and carry on public services.

This is but one indication of the rapid descent of the United States from unequalled prosperity to unprecedented economic depression.

No such condition prevails in any of the large Canadian cities, yet New York bankers insist on holding the Canadian dollar at a severe discount.

The proportionately less gold in Canada than there is in the U.S., but it is a fact that there is also proportionately much less unemployment.

Approximately one-sixth of the population in Toronto must receive its food at present by means of a House of Industry luncheon, but that is far from being as bad as the situation in a Chicago suburb where daily long lines form at a city dump in search of food.

Discover Small Fortune

B.C. Family On Relief Learn Of Bank Balance Long Forgotten

Members of a local family who have been very hard-pressed financially, and dependent on unemployment relief, found an old bank book in a garret. They were advised by a friend to forward it to the bank on the chance that there might be a little balance.

Recently they were advised by the Bank of Montreal that at Vancouver there was \$1,250 standing to the credit of one of the elder members of the family who had forgotten about the account.

Britain's Income Tax

PUT HIM OFF HIS PIPE

Indigestion and Acidity

"A few months ago, I had an attack of indigestion, heartburn and acidity, and had a very nervous habit, especially breakfast. I am a pipe smoker, and for several days I felt as if I could not even touch my pipe. I decided to try Kreslow's Salts. A few days after I had found that the heartburn and acidity had gone, and for the next five or six weeks I have been in my usual good health. I can now smoke my pipe-smoking, and in fact feel about 10 years younger."—H. P.

When your digestive juices fail to flow freely your food lies in the system and ferments, thus causing the distress of indigestion. "The little daily dose" of Kreslow's Salt stimulates the flow of the gastric juices, and thus cures completely the regular and irritating condition of all waste matter every day.

WORLD HAPPENINGS BRIEFLY TOLD

Pure diamonds have been created artificially in the laboratory of Columbia University.

Germany's unemployed at the end of March numbered 6,031,000, a decrease of 68,000 in the month of March.

Dr. Hartley Travers Farrar, geologist, who accompanied Captain Scott on his expedition to the South Pole in 1901-04, is dead.

Dr. John Stantham Plackett, astronomer, will receive an honorary degree from McGill University at the 1932 spring convocation.

Samuel McKay, noted Indian fighter and buffalo hunter, died at Wild Horse, Alberta, recently. He was born in Winnipeg in December, 1852.

It was learned on good authority that Turkey was ready to become a member of the League of Nations and an invitation probably will be issued this year.

Lord Irwin, former viceroy of India, rallied on the "Empress of Australia" for a lecture tour in Canada under the auspices of the Massey Foundation.

An ambulance had been opened at Target's Corner, near Southend, England, on the London-Southern Road, where 364 accidents have occurred in the last 12 months.

Rear-Admiral Sir Godfrey Paine, who died at the age of 60, was buried at sea off the Isle of Wight, after a service in the dockyard church, Portsmouth, England.

Canada's export of wheat during the eight months of the present crop year ended in March was 124,269,450 bushels. Of that amount 71,505,107 bushels went to the United Kingdom.

Canada Steamship Lines

Veteran St. Lawrence River Captain Is Appointed Skipper of the S.S. "Audouine"

Beginning his 42nd year as Captain on the St. Lawrence River, Wilfrid Gagne is again named skipper of the s.s. "Audouine" in passenger fleet appointments announced by the Canada Steamship Lines.

Born in Point Au Pic, Quebec, short distance from the Manoir Richeu, Captain Gagne has spent almost his entire life on the St. Lawrence and Saguenay Rivers and is said to know every turn by heart. During the war Captain Gagne's knowledge of the river was put to good effect as he was given the unique and valuable work of piloting submarines from Quebec to Murray Bay, on their way to the sea. The father of eleven children, Captain Gagne is one of the best known residents of Point Au Pic.

Another veteran's appointment is also included in the announcement recently as Captain Peter McKay, skipper of the s.s. "Noronic," flagship of the Canada Steamship Lines Northern Fleet, again takes charge of the largest upper lakes liner, Captain McKay last year piloted the "Noronic" when she made her historic cruise through the New Welland Ship Canal, and became the largest passenger steamer ever to have entered Lake Ontario.

A Seed Field On the Farm

Better Wheat Brings More Money To the Farmer
(By H. G. L. Strange)

The easiest money to be made by the Canadian farmer is the money his grains bring him when these grains are of high quality, as the work and expense of sowing, seeding, harvesting, threshing and hauling is no more for a high quality crop, that commands a high price, and so the best price for a low quality crop which brings a lower price because of lower grades.

The best Canadian wheat on the world's markets at this moment commands a premium of 17 cents a bushel over the best Argentine or Russian wheats.

It is due entirely to the higher quality of Canadian wheat, which quality is due somewhat to the soil and climate of Western Canada, but mainly to the use of that proper variety in each district that will produce marketed grain.

This proper Canadian wheat is the last fraction of a cent is reflected directly back to the Canadian farmer at the local elevator by Grain Elevator Companies. A high quality crop that brings a high grade, and so the full price, can easily be produced by any farmer who will use the most suitable variety for his farm and district and who in addition will use seed that is reasonably true to that variety.

A recent survey made by the Seale Grain Company in co-operation with Dominion Experiment Station, shows that wheat being marketed at the country elevator, indicated without a doubt that a large number of farmers are growing grades and so good money for themselves, because their crops consisted of a mixture of inferior varieties instead of the best price for the one most suitable variety.

The first step is to decide upon the most suitable variety to use. Only the farmer himself can decide upon the knowledge of his own farm can make this decision, but it can be said that if Marquis wheat can be ripened, say four years out of five, without being frosted, and if it will produce a kernel that is clear and not starchy, and so in Marquis wheat, usually No. 1.

No. 1 northern, that no other variety should be grown, because under these circumstances Marquis has more money-making qualities for the farmer than any other variety.

In some districts, however, early fast fronts degrade Marquis wheat and in some of the northern parts of Alberta and Saskatchewan, particularly where bruise has been growing, Marquis produces a pishel and starchy kernel that only grades a number 3. Under these circumstances, the farmer should consider an earlier variety or one that will throw a clear kernel, although some are finding that the use of fertilizer will ripen Marquis wheat, ripening it to 8 to 9 days earlier, often allows Marquis to escape these early frosts and many districts also helps to produce a clear kernel.

Three early varieties are recommended: Red Bels, 222—Reward and Garnet.

Red Bels 222 is 6 to 7 days earlier than Marquis, yields almost as high as Marquis, and often shatters as starchy as Marquis and often shatters in a dry fall. In some districts, however, this variety is very popular.

Red Bels 222 is a very popular variety, however, this variety is very popular. It contains a little loose mud, which, however, can be controlled, but the yield on the average is lower than that of Marquis or Garnet, although many farmers report that the yield of Reward is increased when sown half a bushel more to the acre is said to be more than with Marquis or Garnet.

Reward wheat is strongly recommended. It has high milling and baking values quite equal to Marquis.

It is a very popular variety, however, this variety is very popular. It contains a little loose mud, which, however, can be controlled, but the yield on the average is lower than that of Marquis or Garnet, although many farmers report that the yield of Reward is increased when sown half a bushel more to the acre is said to be more than with Marquis or Garnet.

Garnet wheat is strongly recommended. It has high milling and baking values quite equal to Marquis.

It is a very popular variety, however, this variety is very popular. Golden Text: "A soft answer turneth away wrath; but a grievous word stirreth up wrath."—Proverbs 15:1.

Lesson: Genesis 24:12-25.

Devotional Reading: Matthew 5:1-12.

Explanations and Comments

Isaac's Prosperity and Its Result—verse 25:17. A hundredfold was given to Isaac because of his sowing and so great were his possessions in flocks and herds, and so great was his household, that the Philistines envied him. Their envy led them to fill up the wells which Abraham had dug, and so Isaac was forced to leave. Without Isaac's consent, his servants, their kinsmen, ordered Isaac to leave. Without Isaac's consent, his servants, their kinsmen, ordered Isaac to leave.

It is used to be a mark of a gentleman that he would instantly resent an encroachment on his rights, and pick a quarrel at a moment's notice. Today that would be a mark of a gentleman. Where education and Christian culture have been their fullest work, there is most patience and gentleness.

Isaac Re-dug the Wells Made by Abraham—verse 25:18. Isaac re-dug the wells made by Abraham which the Philistines had stopped him from digging for a new well in the valley he found that the wells were filled with water by the Philistines. Isaac re-dug the wells made by Abraham which the Philistines had stopped him from digging for a new well in the valley he found that the wells were filled with water by the Philistines.

SUNDAY SCHOOL LESSON

MAY 1
ISAAC AND HIS WELLS

Golden Text: "A soft answer turneth away wrath; but a grievous word stirreth up wrath."—Proverbs 15:1.

Lesson: Genesis 24:12-25.

Devotional Reading: Matthew 5:1-12.

Explanations and Comments

Isaac's Prosperity and Its Result—verse 25:17. A hundredfold was given to Isaac because of his sowing and so great were his possessions in flocks and herds, and so great was his household, that the Philistines envied him. Their envy led them to fill up the wells which Abraham had dug, and so Isaac was forced to leave. Without Isaac's consent, his servants, their kinsmen, ordered Isaac to leave. Without Isaac's consent, his servants, their kinsmen, ordered Isaac to leave.

It is used to be a mark of a gentleman that he would instantly resent an encroachment on his rights, and pick a quarrel at a moment's notice. Today that would be a mark of a gentleman. Where education and Christian culture have been their fullest work, there is most patience and gentleness.

FARMERS WILL MEET TO DISCUSS ECONOMIC PLIGHT

Winnipeg, Man.—Arrangements are already under way for a conference of western Canadian farm organizations and governments with a view to preparing submissions for the Imperial Economic Conference. The meeting will be held in Regina, June 8, and arises out of a resolution passed by the Saskatchewan legislature.

Sponsored by the Premier of Saskatchewan, Hon. J. T. M. Anderson, and his ministers, the gathering as at present planned will consider only the point of view of western agriculture. The provinces of Alberta and Manitoba will be invited to send representatives.

Whether a broadening out of the Regina conference to include agricultural interests of all provinces which would carry out the suggestion of an all-Canada meeting advocated by Cassin Gagnon in the House of Commons, would be considered, could not be learned. In general, however, it would not likely meet with much opposition.

United Farmer organizations in all three prairie provinces have recently approached farmer organizations in eastern Canada with a view to getting together to evolve a common policy in the interests of Canadian agriculture.

Advisory Committee On Research Work To Give Direction To Scientific Agriculturalists Throughout Canada

Winnipeg, Man.—Creation of a new advisory committee on agricultural research to co-ordinate and give direction to the work of scientific agriculturalists throughout Canada, was announced Thursday, April 20, by Dr. H. M. Tury, chairman of the National Research Council.

Authority for setting up the committee had been given by the Dominion Government and the personnel would be announced shortly.

The new national committee will be representative of the research institutions of Canada including the agricultural research departments of the Dominion Government. It will meet annually or oftener to review general problems, recommend methods of attack and develop for the benefit of the proper authorities a picture of the agricultural situation.

Designed as a permanent co-operation among research organizations, Dr. Tury expects the committee without increasing costs will enlarge the output of scientific research in Canada. He predicted the co-operative plan the national research council has been promoting through the last 10 years will increase the results of research by 30 per cent.

As an instance of the benefits of co-ordinating research work, he said the results now reported in connection with wheat rust might have been delayed for 20 years without the co-ordinating efforts of the associate committee, on field crop diseases.

To Prepare Report Hearing Of Evidence In Radio Probe Is Completed

Ottawa, Ont.—The future of Canadian broadcasting so far as public subsidies are concerned, and with the parliamentary broadcasting committee which has completed the hearing of evidence started on March 8.

The committee will commence private sittings shortly to prepare a report which will be submitted to parliament.

Build Village For Athletes
Los Angeles, Calif.—Like the host towns of the old gold rush days in California, there has grown in the Baldwin Hills, near here a cluster of 100 houses in less than three weeks. It is the Olympic village, where some 2,000 of the world's picked athletes will live for a few weeks this summer. The last of the houses has been erected.

French Agents Beat Record
London, Eng.—The Reuters News Agency reports that the French agents Goulette and Sael had flown over Le Bourget, France, to Cape Town, South Africa, in 91 hours, or about 22 hours less than the recent record time of J. A. Mollison, British flyer, from London to Cape Town in 100 hours, 15 minutes.

The French fliers arrived at Cape Town April 20.

Mine Shaft Extended Into Saskatchewan

Pin Flon Development Should Encourage Mining in Province
Regina, Sask.—The shaft of the huge Hudson Bay Mining and Smelting Company mine at the Pin Flon, Saskatchewan border, according to Major J. Barnett, Deputy Minister of Natural Resources for the Province, is the only mining for copper, zinc and gold which has been done on the Manitoba side.

Major Barnett has returned from a visit to the northland and at the Hudson Bay Junction held conference with field men of the Department on forest fire and other work to be carried out in the north this season.

The extension of the shaft over the Saskatchewan border and the subsequent mining, should encourage smaller mines to start up in the opinion of Major Barnett. The presence of the \$200,000 plant of the mining company will enable the small miner in Saskatchewan to use the facilities in processing the raw material.

The mine is now working the full 24 hour shift, and there is considerable activity at that point.

Would Pool Railway Operations

Operating Board To Run the Two Systems Suggested By Conservative Members

Ottawa, Ont.—Pooling of the operations of the Canadian National and Canadian Pacific Railways, with a resultant saving of possibly \$80,000,000 a year, was the suggestion thrown into the budget debate in the House of Commons. The appointment of an operating board to run the two systems as one, with consequent elimination of waste and duplication, was held up as a possible temporary solution of the serious transportation problem which Canada is faced. While operations would be pooled, the roads would remain as distinct entities. The properties would stay just as they are today.

J. T. Hackett (Conservative, St. Catharines) made the suggestion. He declared parliament must "stem the gush of financial life of this country by grasping any opportunity to solve the problem. His proposal, he asserted, was merely temporary, and he expressed hope that the transportation commission would have some beneficial remedies to offer.

Police Watching Border

To Prevent Unemployed In States From Entering Canada

Ottawa, Ont.—Immigration and customs officials of the Dominion are keeping a close watch on the entry of the Canadian Mounted Police, are closely co-operating to prevent the unemployed of the United States from entering Canada.

Provisions of the Immigration and Labor acts will be applied in a strict manner to job seekers who attempt illegal entry into Canada. Some months ago an order-in-council, especially dealing with contract labor, was passed. These provisions, which will likewise be rigidly enforced, are aimed to prevent the entry of people who come to this country under a contract of employment or to negotiate for employment.

Perjury Charge Dismissed

Quebec, Que.—The charge of perjury preferred against Capt. J. E. Bernier, widely known Canadian explorer and navigator, following a complaint made by Raoul Harvey, a seaman, was dismissed by Magistrate Ferdinand Roy recently. Harvey claimed the captain perjured himself when called to testify before the Dominion wreck commissioner's inquiry into the sinking of the S.S. Guide, in 1928.

Trade Treaty With Cuba

Ottawa, Ont.—The Canadian Government is considering entering into a reciprocal trade treaty with Cuba with a view to creating a market for Canadian products. This information was contained in an answer of the secretary of state in the House of Commons to a question of Oscar Boudreau (Liberal, Bellefleur). A request to institute the treaty was received from a group of farmers of New Brunswick.

Ask Tax Remission

Ottawa, Ont.—A large delegation of ice suiters has petitioned parliament with requests of the government with a request for removal of the six per cent. sales tax on their product, which is in the budget now before the House of Commons.

Hidden Explosives

Moisture Staves Workmen From Death When Hammer Strikes Dynamite

Victoria, B.C.—Fifty sticks of dynamite, with a handful of detonators, have been taken from the middle of the new Mount Douglas road by Stannish workmen and destroyed.

Only the heavy downpour of rain which marked the week-end saved the men from being blown up when one of the workers drove his mallet through the stick of explosive.

The dynamite was buried six inches below the surface of the gravel pit at the crest of the hill. The condition of the soil on the northward and the explosives had been hidden about eighteen months ago, at the time when Stannish was carrying out extensive clearing operations on the roadway.

GIVE RESULTS OF RUST-RESISTANT WHEAT TESTS

Winnipeg, Man.—Varieties of rust-resistant wheat which have been tested so far for milling and baking qualities appear to be quite satisfactory in that respect, L. H. Newman, Dominion cereal expert, declared at the associate committee on field crop diseases of the National Research Council, at the second session here of their summer meeting.

The committee is considering the preparation of a statement following this meeting showing the results of tests of wheat in farmers' hands. Thirteen varieties of this wheat used in the experiment described to the meeting by Dr. C. H. Coulson, of the Winnipeg laboratory, show good results in the length of its straw, in its weight, in its yield per acre, and in the number of days it takes to mature.

Dr. F. J. Greaney, also of the laboratory, reported it had been proved that wheat will protect grain from the attacks of rust, although it will not help a plant which has already been infected. He said efficient methods of spraying the surface of wheat have been developed, but they might not come into general practice because of economic conditions.

The accurate identification of fungi is an important step in rust research, and it was pointed out by H. Butler, of the University of Manitoba, told the members. He suggested better library facilities here would greatly aid the work.

Dr. O. S. Amdett, University of Alberta, outlined for the committee progress which has been made in testing certain varieties of drought-resistant wheat brought to this country from Russia in 1928. Emphasizing the importance of this branch of research in breeding, he urged further intensive study through practical field tests be conducted in the varieties which had already been brought down to the segregating generations, and said the cost of equipment for the work would not exceed \$500.

Railway Line Flooded

Edmonton, Alberta.—Flood waters from the Athabasca River cover more than nine and a half miles of track on the Northern Alberta Railway line to Waterways, on which service has been temporarily suspended.

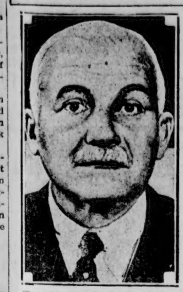

ANGLO FRENCH CONFERENCE AT 10 DOWING STREET

Toronto, Ont.—One cent per gallon increase in the price of gasoline, effective throughout the greater part of the Dominion, April 21st, was announced here by the Imperial Oil Company. The increase, said by the company to be necessary to offset in part a jump in crude oil prices, affects Ontario, most of Quebec province, and Manitoba, Saskatchewan, and Alberta.

Delegates From Russia

Ottawa, Ont.—Extended an invitation to participate in the Fifth Pacific Science Congress, scheduled to meet in Canada in 1933, Russia has accepted and the Union of Soviet Socialist Republics will be represented by at least ten official delegates. The congress sessions will be held in Vancouver and Victoria, B.C.

SOVIET PLOT VICTIM

Charging that Soviet Russia is out to ruin him and to destroy public confidence in his enterprises, Sir Henry Detering, British oil magnate, recently told how Soviet agents by a covert campaign of lies have attempted to depreciate the value of stock exchange shares. At various times these agents circulated rumors that Sir Henry had absconded, that he was dead, and that he was bankrupt, in order to secure his stocks.

Economic Conference

Parliament To Discuss Matters Pertaining To Important Events

Ottawa, Ont.—Parliament will probably hear a discussion on the Imperial Economic Conference shortly. When the vote of \$250,000 to defray expenses of the Empire, Hon. R. B. Bennett is prepared to set aside a day for members who may wish to put their views, and may himself make a brief statement.

With definite assurances that all parts of the Empire will be represented by prominent delegates at the opening of the conference here on July 21, the "spade" work is being pushed forward. Committee sub-committees and inter-departmental organizations are hard at work.

Under the supervision of the cabinet of cabinet sub-committees, departmental committees are gathering essential information and making preparations. The agenda itself has not been completed. When that stage has been reached, the question whether or not a completed agenda will be laid before the House will depend on what is thought desirable after consultation with all the governments concerned.

Boost Gasoline Price

Toronto, Ont.—One cent per gallon increase in the price of gasoline, effective throughout the greater part of the Dominion, April 21st, was announced here by the Imperial Oil Company. The increase, said by the company to be necessary to offset in part a jump in crude oil prices, affects Ontario, most of Quebec province, and Manitoba, Saskatchewan, and Alberta.

Delegates From Russia

Ottawa, Ont.—Extended an invitation to participate in the Fifth Pacific Science Congress, scheduled to meet in Canada in 1933, Russia has accepted and the Union of Soviet Socialist Republics will be represented by at least ten official delegates. The congress sessions will be held in Vancouver and Victoria, B.C.

Cattle Export Problems

Will Probably Come Before Imperial Economic Conference

Ottawa, Ont.—Senator Arthur Meighen, government leader in the Upper House, announced that problems facing cattle exporters would be brought to the attention of the chairman of the committee arranging for the Imperial Economic Conference which meets in Ottawa in July.

Canadian cattle encountered many restrictions when entering the British market, said Senator D. E. Rieu, introducing the subject. Nothing would help Canadian agriculture more than the improving of the live cattle trade.

Canadian cattle encountered less favorable conditions in the British market than Irish cattle, he said. A total of 20,000 cattle crossed the ocean last year but the trade could be developed to a greater extent than this, if restrictions were modified. The best opportunity to review the entire trade would be at the conference table.

Organization of the conference agenda was under the supervision of the cabinet and Senator Meighen. Memoranda were being prepared on tariff, exchange, currency and other topics and he would undertake to bring to the attention of the government the important subject of the cattle trade.

U.S. ATTACKS ON WHEAT POOL ARE REFUTED

Ottawa, Ont.—That the co-operative wheat pool movement in Canada was being attacked by propagandists in the United States and improperly cited by them in their fight against the co-operative movement in that country, is a matter of regret, and ought not to be allowed to pass without answer. This is the opinion of Hon. H. C. Stevens, Minister of Trade and Commerce, expressed in a statement made public here.

Referring to articles published in Chicago and elsewhere in the United States to the effect that Canadian wheat pools had accomplished the "ruin of Canadian wheat farmers" who were threatening to "strike against taxation" and talking "secession," Mr. Stevens declared that Canadian wheat pool members still had faith in their co-operative organization and were shipping a large portion of their grain through pool elevators. Furthermore, no losses have been sustained by farmer members of the wheat pools other than that they were disappointed at not obtaining further sums for their 1929 wheat sold through the pools owing to the sudden drop in prices.

"The profits of farmer-owned handling facilities have always been very large, and no doubt will rapidly reply the advances made by the prairie governments" without any loss to the governments concerned," said the minister.

"The situation in respect to the wheat pools in the three prairie provinces," said Mr. Stevens, "is substantially as follows:

"Three pools, previously operating under a contract with their growers, have released those members from the operation of that contract. The holdings of the wheat pools as pools are gradually being liquidated by the pools themselves as market opportunities afforded, being only assisted by the Dominion Government in their financing. Pools, however, are operating their subsidiary elevator companies independently which are still solvent and are in no danger of liquidation. Certain losses amounting to some \$2,000,000 were sustained by the pool on the loss of the advance payment to their farmer members proving excessive in view of the slump in the market. These losses were guaranteed by the various provincial governments, according to the provincial interest, in approximately the following proportions: Alberta, \$5,000,000; Saskatchewan, \$15,000,000; Manitoba, \$2,500,000. The provincial governments have made good these amounts to the banks and have negotiated agreements with the pools for the repayment, which will be done out of the earnings of the subsidiary elevator companies and other assets of the pools. To secure themselves, the various provincial governments have taken a first charge over the assets of the pools, namely elevators, terminals, etc., of an approximate value of some \$30,000,000. No losses were sustained by the farmer members other than the disappointment of not obtaining further sums for their wheat sold through the pools. This, of course, is a contractual liability."

RAISING TARIFF WALL AROUND THE BRITISH ISLES

London, England.—The tariff wall around Great Britain, once the leading exponent of free trade, was doubled in height today.

The imperial duty advisory committee recommended that a total duty of 20 per cent be imposed on nearly every type of imported goods imported into the nation. The new rates became effective after midnight, April 28. The general tariff law now in effect assessed imports 10 per cent.

The advisory committee authorized under the general tariff act to recommend changes which are put into effect by order of the treasury, described the new tariff policy thus: "For most manufactured goods, an additional duty of 10 per cent, making 20 per cent, in all, on a limited number of others, for which a lower rate seems appropriate, total duty will be 25 per cent. The tariff for articles of luxury or semi-luxury character, total duties will be 25 or 30 per cent."

When the new rates became effective, the orders issued under the Abnormal Importations Act, which imposed an ad valorem duty of 50 per cent on certain classes of goods, will be revoked.

The advisory committee treated food and staples differently, proposing, putting a total duty of 33½ per cent on semi-finished steel for a period of three months.

Import duties in imports to Great Britain, recommended by the tariff advisory committee, will not apply to goods from Canada or other parts of the British Commonwealth, owing to the government's decision that empire goods shall not be subject to duties. The tariff for imports to Ottawa, Imperial Economic Conference next July.

B.C. Placer Mining

Would Put Unemployed To Work Panning Gold

Victoria, B.C.—Plans for putting unemployed men to work by washing gold in the streams of British Columbia are being shaped at conferences here between the government and officials of the mines department. Under a scheme discussed in a general way at the recent unemployment conference at Ottawa, it was proposed that unemployed men, who desire to do so, shall be given gratuities which will enable them to carry on placer operations. They would reap the cost of their maintenance and keep any amounts which they made over and above their expenses.

Mines department officials believe that in many parts of the province men working in small numbers could be encouraged to work themselves and many, with luck, could make reasonable wages.

New Zealand Will Censor All Messages

To Prevent Alarmist Reports Being Cabled Overseas

Wellington, N.Z.—A censorship of messages sent abroad will be instituted by the government in order to prevent alarmist reports concerning possible recurrence of disorders in Auckland or elsewhere being cabled overseas. The government has decided to enforce the provisions of the postal regulation which gives this power. Meanwhile both houses of parliament have passed the government's bill seeking emergency powers to deal with disturbances of this kind as they arise. Auckland when mobs of unemployed got out of hand and did considerable property damage and looting.

Engineer Dies At Post

London, Ont.—While his 60-mile-an-hour International Limited passenger train sped along between Kenwood and Stratford on the Barrie to London line, Engineer Arthur Alexander Bond of Barrie died of heart failure. Fireman R. Falconer of Barrie brought the train into London 50 minutes late.

To Honor Scientist

Montreal, Que.—Dr. Jean A. Plante, director of the Dominion Astrophysical Observatory at Victoria, B.C., will receive the degree of Doctor of Laws at the spring convocation of McGill University, May 23.

Drug Addicts In Canada

Pittsboro, Ont.—Every effort had been made in Canada to restrict the drug traffic yet it was estimated London were \$300,000, as those at St. Hy. Hon. Arthur Meighen told the Senate.

SUPERTWIST
CORDS IN

HOW MANY SUPERTWIST CORDS

IN THE AVERAGE GOODYEAR TIRE?

THE AVERAGE
GOODYEAR
TIRE?

\$3,000.00
IN CASH PRIZES

1st prize — \$1,000.00 cash
2nd prize — \$500.00 cash
3rd prize — \$200.00 cash
4th prize — \$100.00 cash
5 prizes, each \$50.00 cash
95 prizes, each \$10.00 cash
104 prizes totalling \$3,000.00

\$1,000.00 in cash—extra! It
would look pretty good to you right
now, wouldn't it? Well it can, in-
vest a few minutes of your time to
get it. Entering this contest will
not cost you a cent of your money
—but you'll get some fun out of it,
particularly if you like a little pro-
blem in arithmetic.

Here are the simple facts of the
contest: Anyone from a household
where a car is owned may enter.

There is no entry fee, nothing to
buy, no special requirement. All
tire dealers, all rubber company
employees and the families of both
are, however, debarred.

See the six Goodyear Tires of
various sizes, types and ply-thick-
nesses on display here. Then esti-
mate the number of cords in each,
find the total, and divide by six to
obtain the average. A section of
Goodyear Supertwist Cord fabric is
on display to help you make your
estimate.

Get a standard entry form from
us on which to make your entry.
Closing date: June 5th, 1932.
Address: "The Goodyear Super-
twist Cord Contest," New Toronto,
Toronto 14, Ontario.

Village of Champion

Owners of dogs are advised that
1932 tags are at the Village office, and
the same must be procured before
April 30th, rates are \$2.00 and \$5.00.
Riding bicycles on sidewalks is con-
trary to law and infractions will be
prosecuted.

The annual cleanup will be observed
during the last week of April, and
householders are instructed that refuse
must be hauled in vehicles with sides,
so that the refuse will not be scattered
as it is being hauled away.

The co-operation of all householders
is requested in making this cleanup as
effective as possible.

Albert Mutz

Dies Suddenly

Following an illness of two months,
Alfred Mutz, 1342 Thirteenth avenue
west, Calgary, died at his residence
Monday evening at the age of 60.

Born in Germany, deceased came
to the United States in 1884, and to
Canada in 1903. He was the founder
of the Fernie, B. C. Fortistat Brewery.
The late Mr. Mutz is survived by
three daughters, Mrs. A. Anderson,
Calgary; Mrs. L. Leverington, and
Mrs. Roy Ferguson, both of Vulcan.
Three sons, Teddie and Max, of Vul-
can, and Emil, of Calgary, also sur-
vive.

Funeral services will be held from
Shaver's funeral establishment Thurs-
day afternoon at 3 o'clock. Rev. Dr.
Geo. W. Kerby will conduct the ser-
vice. Interment will be made in the
Burnside cemetery.

Don't forget the Mothers'
Day Tea and Bake sale on Sat-
urday, May 7th, in Campbell's
Hall. Supper will be served
from 5.30 to 7.30. Watch pos-
ters for an attractive menu.

The eastern man who spent his last
dollar for a couple of auctioned suit-
cases and found nearly 80,000 in an
old photograph album in one of them,
certainly looked luck in the face once
in his life.

With the discovery of a method of
preserving foods without deteriora-
tion, quick freezing, we learn, is the
fastest growing industry on this con-
tinent. The addition of this frozen
meat to those already existing in the
realm of agriculture may have the
effect of throwing out some of the
others.

One machine which does not lessen
employment is the political machine.
